

### Work Experiences:

#### UX/UI Designer - AutoMetrics

September 2021 - March 2022

- Led end-to-end design process, conquered challenges and identified opportunities to enhance the visualization of complex machine learning data on a dashboard interface, providing users with valuable insights and cost saving predictions in weld production.
- Conducted user research to understand current user pain points, developed new product goals and design directions based on user feedback and did competitive analysis to understand industry trends. Collaborated closely with stakeholders to propose and implement multiple rounds of design iterations, ensuring pixel-perfect precisions and preparing the company's next-generation product for launch
- Created marketing videos and brochures that highlighted the company's core features and main services. Also updated the company's website using Wix with new web design following the company's brand guidelines

#### Web UX Designer - Build a Biz Kids

February 2021 - April 2022

- Participated in a side project with YouMoveMe to redesign their Franchise Opportunity Webpage
- Collaborated closely with co-worker to re-design the company founder's personal webpage which became more engaging and organized

### Volunteer Experience:

#### Graphic Design Volunteer - Build a Biz Kids

February 2021 - April 2022

- Maintained the company brand style, designed multiple-day curricula for facilitators that were easy-to-follow, while later became a template for future courses
- Designed logo for the organization's stock game for kids. Did Sketches, and iterations following the brand guideline while keeping kids as users in mind
